

Ultrafast Broadband

Gigaclear, the company building a broadband network for rural communities is planning to install access to ultrafast broadband to 364 properties in the Parish. Properties in Nettleton, Nettleton Green, The Gibb and Burton are included in the planned roll-out. We have been informed that West Kington isn't included currently because the installation isn't commercially viable.

There will be quite a bit of disruption as Gigaclear installs cables underground. If you want to know more about their plans for your property please visit gigaclear.com, or telephone 01865 591137.
